Morale of any organization is directly proportional to safe work conditions & safe workplace.
ZERO ACCIDENTS is a key parameter for creating a fearless work culture in organization of any scale. BEtS has developed a course 5S & Safety for All to create awareness, identify and eliminate unsafe acts and unsafe working conditions. Uniqueness of this course lies in its emphasis on behavior-based safety rather than only knowledge and skill. BEtS provides training as well gives support for implementation of these concepts at workplace

The Need

In many organizations, safety is not a priority. Even though workplaces remain cluttered & unsafe, people are unaware and casual about it. Most accidents are caused by unsafe acts and unsafe conditions. Occurrence of such unwanted events create an atmosphere of fear and uncertainty which hampers the overall efficiency. These unsafe conditions may cause injuries, loss to property and even life. This may lead to loss of business and credibility of the organization. Hence the role of top management, executives, middle managers and functional level employees in creating a ZERO injury environment is critical.

Scope and Benefits

- Learn a systematic way to develop culture of creating safe workplace as per industry standards
- Emphasis on prioritizing workplace safety
- Understand importance of safety audits in the organization
- Develop a proactive approach & priority towards safety
